

INDUSTRY

DUST EXTRACTION TECHNOLOGY

DUST EXTRACTION AND STRUCTURAL STEELWORK

It's all up in the air

Where the various dust removal technologies are concerned, KNAACK & JAHN Anlagenbau have worked for many years skilfully and in a trustworthy manner for diverse branches of industry. Our service includes advice, planning and also the new building and conversion of complete systems and plants, as well as modification with steel structures.

In addition, we support our customers in the constant further development of the dust extraction processes used and in the modernization of existing plant. This also includes modification with regard to the type of filter, the filtration material and the adaptation of all plant components.

Where permits are concerned: Everything's tested and top of the form.

Services

- Assembly of electrical and mechanical gas scrubbing systems
- Carrying out procedures for optimizing gas scrubbing systems
- Servicing and maintenance, inspections of electrical and mechanical gas scrubbing systems, gypsum, coal and salt silo systems, asphalt mixing apparatus and ash removal installations
- Checking the ventilation of dust removal pipeline systems
- Steel structures and ironworks

THE RIGHT PROCEDURE AT THE RIGHT TIME

Branches of industry

- E.ON Kraftwerke GmbH, Bremen, Kiel, Wilhelmshaven
Inspection gypsum silo
- E.ON Kraftwerke GmbH, Staudinger
Inspection electrostatic filters for Blocks 1, 3 and 5
- Georg Fischer GmbH, Albershausen
Inspection and repair bag filter systems
- MIBRAG Mitteldeutsche Braunkohlengesellschaft mbH, Deuben
Inspection electrostatic filters for Boilers 2 to 6, inspection gypsum silo
- Großkraftwerk Mannheim AG
Inspection electrostatic filters for Blocks 3, 4, 6, 7 and 8, inspection gypsum silo
- KEMNA BAU Andreae GmbH & Co. KG
Plant inspections at various locations
- Metallo-Chimique N.V., Beerse, Belgium
Intensive filter fitment to bag filter system
- SCHWENK Zement KG, Bernburg
Inspection electrostatic filter
- SQW GmbH, Lüptitz
Inspection and repair bag filter systems
- Vattenfall Europe Generation AG & Co. KG, Lippendorf
Inspection electrostatic filters for Blocks S and R and gypsum silo
