

INDUSTRY

PIPELINE AND PLANT CONSTRUCTION

PARTNER TO INDUSTRY FOR OVER 45 YEARS

Professional from A to Z

With around 400 employees and over 45 years of experience in pipeline and plant construction, KNAACK & JAHN is one of the most competent and reliable partners to German industry. We operate in the most diverse sectors of industry, enabling us to network our expertise for optimum results.

We regard our core competence as pipeline and plant construction for industry, building technology or shipbuilding. Our planning team will provide you with support for all questions concerning design, materials selection, routing and construction planning as well as in drawing up all the documents required for pipeline and plant construction.

From repair work and pipe construction to the complete system, you will find an experienced and competent partner in KNAACK & JAHN.

Industrial sectors

- Tank farms and refineries
- Chemicals industry
- Pharmaceutical and semiconductor industry
- Food industry
- Drinks industry
- Automotive industry
- Technical gases, equipment and installations
- Utilities
- Dockyards and shipping companies
- Microprocessor production

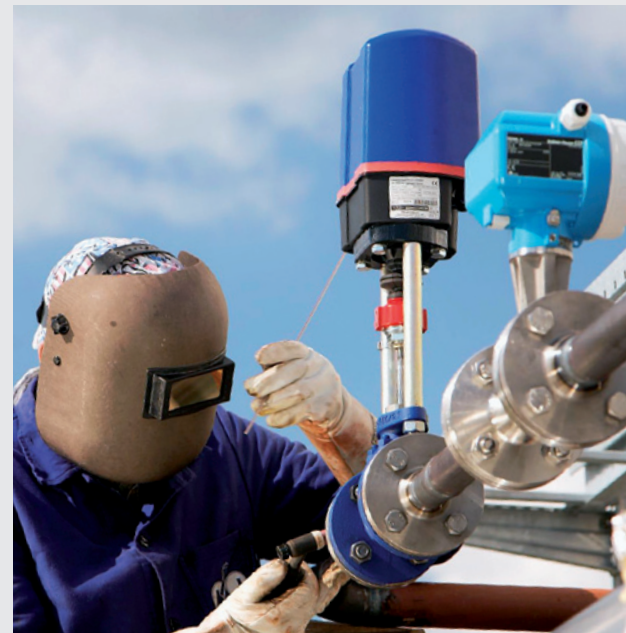

Services

- Pipeline and plant construction
- EMSR technology
- VDE measuring in accordance with BGV A2
- Gas technology
- Laboratory technology

- Ship's pipelines / technical support at port facilities
- Surface engineering
- Information technology
- In-house support through air-conditioning, heating and plumbing technicians

Process controls and automation with software control, with management systems or even process visualisation are developed and programmed in-house. We are very familiar with endoscopy, leak tests and pig trap systems and we support our customers in carrying out cleaning tasks with an own dry ice system.

SAID. DONE!

CUSTOMISED, SOLUTION-ORIENTATED, TURNKEY

24 hour full service

KNAACK & JAHN provides the highest quality and a full service concerning all aspects of pipelines. From planning to assembly and a 24 hour service. Our method of working is always customer-specific and our solutions are always tailor-made. What distinguishes us above all else: Our customers can rely on our word 100%. For appointments, prices and quality.

Fittings and distributors are produced in our own workshops. Pump stands and control groups can be prefabricated or complete assembly groups can be preassembled. Our own vessel and apparatus construction enables all orders to be realised exactly and rapidly.

Pipelines are laid in all nominal widths and materials for the most diverse media. On pipeline routes, pipe bridges or in the ground, as unpressurised lines, as pressurised lines or as double-walled pipelines – KNAACK & JAHN provides the ideal solution for every order.

Besides all steel and stainless steel materials, special materials such as titanium and plastics such as PE, PP and PVDF are also processed. Conventional welding processes are complemented by infrared welding and orbital welding methods (open and closed). Installations in clean rooms of classes 100 and 10 round off our range of services.

KNAACK & JAHN provides support for downtime work in all branches of industry, from planning to prompt realisation. Project and works supervision and/or assembly teams are provided, depending on requirements.
